

MEDICAL GAS AND VACUUM SECONDARY EQUIPMENT PREVENTATIVE MAINTENANCE SERVICES

WHY CHOOSE ACUTE MEDICAL GAS AS YOUR SECONDARY EQUIPMENT SERVICE PROVIDER?

Our primary objective is to aid your facility in the required inspection and maintenance of your patient care secondary equipment, including suction regulators, flow meters, and equipment, at an efficiently and effectively at an economical cost. We are committed to determining your current inventory and verifying operational performance per the manufacturer's specifications.

WHAT ARE THE REQUIREMENTS?

Our programs were developed to meet the regulatory requirements of the National Fire Protection Association (NFPA 99: Health Care Facilities Code Requirements) and The Joint Commission (Environment of Care Requirements).

Section 5.1.13.8.4 of NFPA 99 requires health care organizations to develop a program for both the medical-surgical vacuum piping systems and the secondary equipment connected to the station inlets to ensure the performance requirements of both the system and secondary equipment is meeting the manufacturer's specifications.

The Joint Commission EC02.04.03 states that hospitals must document the required inspection, testing, and maintenance of equipment used for life support. The program must have maintenance strategies to minimize the clinical and physical risks to patients utilizing this equipment.

COMPREHENSIVE SERVICE OF SECONDARY EQUIPMENT:

We offer preventative maintenance, service, and repairs of all types of suction regulators. This includes annual inspection, cleaning, and inventorying services. We can also check for defective parts, test equipment for proper operation, and provide cleaning of internal and external parts.

We offer preventative maintenance, service, and repairs of all types of flow meters. This includes annual inspection, cleaning, and inventorying services. We can also check for defective parts, test equipment for proper operation, and provide cleaning of internal and external parts.

REPAIR / REPLACEMENT PROGRAM:

We believe in providing our customers with the best quality service at the lowest possible price. One way we achieve this is with our "Repair / Replacement" Program. If the price of the repairs is great than the price of new equipment, this program puts a new flow meter or suction regulator on your fitting to replace the defective equipment.
