
STATEMENT OF QUALIFICATIONS

MISSION STATEMENT:

TO PROVIDE COMPREHENSIVE HIGH-QUALITY MEDICAL GAS SERVICES EFFICIENTLY AND EFFECTIVELY WITH A COMMITMENT TO PATIENT SAFETY

COMPANY OVERVIEW:

Acute Medical Gas Services, Inc. (AMG) is a privately held company that was formed as a result of the merger of Certified Medical Gas Services (CMGS) and Green Mountain Medical Gas Services (GMMGS). Many of our clients have been with us for numerous years via our former companies, and we continue to have the same commitment to excellence that you've known from us in the past. The company has the vision to be a single-source, turnkey provider of comprehensive medical gas services. Since our team has over 100 years of combined experience, we have seen almost everything in the industry at least once. Rest assured, we will identify any matter that has an impact on patient or personnel safety. Our "Gold Standard" operating procedures offer the greatest protection in patient and personnel safety available in the industry.

Mr. Jonathan C. Willard is the president and co-owner of the company. He has worked in the medical gas and health care construction industry for about 20 years. Prior to starting the company, he was the vice president of operations for a large mechanical contractor and also worked as a project manager on some of the most significant and complex health care projects in the region. He holds numerous certifications and is one of only a handful of individuals that has earned all of the ASSE 6000 medical gas certifications. He is a principal member of the Technical Committee on Medical Gas and Vacuum Piping Systems (NFPA 99: Health Care Facilities Code) and a principal member of the Technical Committee on Industrial and Medical Gases (NFPA 55: Compressed Gases and Cryogenic Fluids Code). He currently serves on the Medical Gas Professional Healthcare Organization (MGPHO) Board of Directors and is also a LEED AP (Accredited Professional), a certified Project Management Professional (PMP), and a Certified Healthcare Constructor (CHC) with a Master of Science degree in Business Education.

Mr. Doug Ostraat is the vice president and co-owner of the company. He has worked in the medical gas industry since 1970, first as a respiratory therapist and then as a supervisor, responsible for the maintenance and testing of a health care facility's medical gas and vacuum systems and related secondary equipment. He left the organization to become a sales and service representative for a large medical gas and respiratory care equipment distributor. In 1978, he started his own company, Green Mountain Medical Gas Services (GMMGS), which he has operated as an independent distributor of medical gases, respiratory therapy, and life support equipment. For the past 35 years, GMMGS has been providing medical gas system service, testing, and training.

We pride ourselves on being involved in ALL aspects of the medical, laboratory, industrial, and research gas industries. We have accomplished this by taking part in the following:

- Code and standard technical committee memberships, which contributes to patient safety
- Publishing articles that promote health care education and awareness
- Assisting in the development of comprehensive operation and management programs in partnership with organizations committed to best practices, which helps to ensure life supporting equipment remains as safe and reliable as possible.
- Providing training and consulting in all areas of the medical gas industry including emergency preparedness and disaster management, installation and maintenance procedures and best practices, design and construction management, medical device design and manufacturing consulting, system commissioning, personnel training and certification program development.

Acute Medical Gas Services is committed to becoming the region's leader in comprehensive medical gas and environmental testing services by focusing on patient safety, quality service, and customer satisfaction.

The company is registered with the US Federal Government in the Central Contractor Registration Database and with Dun & Bradstreet.

ACUTE MEDICAL GAS SERVICES, INC.
MANCHESTER, NEW HAMPSHIRE

OVERVIEW OF SERVICES:

The company provides Inspection, Testing and Verification Services, Sales and Installation Services, Preventative Maintenance, System Assessments, Systems Training, and Consulting. AMG has also designed a code compliance program to assist health care organizations in achieving and maintaining regulatory compliance. This program design focuses on assessing and evaluating existing systems with the goal of reducing patient risk and organizational liability.

AMG is a training affiliate of the National Inspection, Testing, and Certification Corporation (NITC) and the Medical Gas Training Institute (MGTI). Mr. Willard is listed as an approved Medical Gas Professional Healthcare Organization (MGPHO) instructor on their website. AMG offers training for the ASSE 6010 Medical Gas Systems Installer, ASSE 6020 Medical Gas Systems Inspector, and ASSE 6040 Medical Gas Systems Maintenance Personnel certifications at various locations throughout the country and abroad.

COMPLETED PROJECTS:

AFGHAN NATIONAL ARMY GAMBERI HOSPITAL

The ANA Hospital in Gamberi, Afghanistan was recently completed by the United States Army Corps of Engineers. Acute Medical Gas Services provided consulting, verification, and training services for the construction and facility operations team for the project. This project included the installation of new medical gas source systems including the manifold central supply systems, medical air central supply system, medical-surgical vacuum central supply system. This work was completed in a remote part of the country by local tradespeople.

UNIVERSITY HOSPITAL OF MIREBALAIS

Partners in Health recently completed the construction of a 205,000 square foot, 300-bed facility near Port-au-Prince, Haiti to fill a huge void, locally and nationally, for people who previously had limited access to quality health care. The hospital provides primary care services to about 185,000 people in wide area of central Haiti.

Acute Medical Gas Services provide pro bono consulting and onsite testing and verification services. AMG also assisted with all aspects of the final certification of the medical gas and vacuum systems on the project.

HUGGINS HOSPITAL

The Huggins Hospital recently completed a major renovation and expansion project. This included installation of new medical gas source systems including the bulk oxygen supply system, medical air supply system, medical-surgical vacuum supply system and a large emergency department addition to the facility. This work was completed while the hospital continued to provide patient care throughout the project.

Acute Medical Gas Services assisted with all aspects of the medical gas system renovations and additions including system certifications during the many phases of the project.

CHILDREN'S HOSPITAL BOSTON

Acute Medical Gas Services has been providing comprehensive testing and inspections services to Children's Hospital Boston since 2007. The facility in conjunction with AMG has developed one of the most comprehensive testing and inspection programs in the region. The program includes inspection, testing, and performance verification of all the medical gas systems on a continual basis to ensure that equipment reliability and patient safety are constantly protected.
