

ABOUT US

Acute Medical Gas Services was formed as a result of the merger of Certified Medical Gas Services and Green Mountain Medical Gas Services.

Many of our clients have been with us for many years via our former companies and we continue to have the same commitment to excellence that we have provided in the past.

Our team has over 85 years of combined experience. Our "Gold Standard" operating procedures offer the greatest protection in patient and personnel safety available in the industry.

We pride ourselves on being involved in ALL facets of the medical gas world.

With over 85 years of experience, our team is committed to being the leading provider of comprehensive medical gas services.

The foundation of our company is built on quality service, customer satisfaction and *most importantly*, PATIENT SAFETY.

OUR COMMITMENT

While we are a growing team and an expanding business, at any time, we, the owners of the company, are available to assist you with any of your medical gas needs. If you need anything at all, please do not hesitate to contact either one of us at 603.487.3800.

"THE GOLD STANDARD"
IN COMPREHENSIVE MEDICAL GAS SERVICES

Acute Medical Gas Services was founded with the vision to be a single-source, turnkey provider of comprehensive medical gas services.

Our company provides the following services:

- Inspection and Testing Services
- Verification and System Certifications
- Environmental Monitoring and Testing
- Consulting Services
- Sales and Installation Services
- 24 Hour Equipment Service & Preventative Maintenance
- System Back Feed & Shutdown Management
- Equipment Rental and Lease Programs
- Training and Personnel Certification Programs

OUR MISSION

TO PROVIDE HIGH QUALITY
COMPREHENSIVE MEDICAL
GAS SERVICES EFFICIENTLY
AND EFFECTIVELY WITH A
COMMITMENT TO
PATIENT SAFETY.

CONSULTING

We offer consulting services with the highest level of professionalism by focusing on patient safety, quality service and customer satisfaction.

- Comprehensive operation and management programs
- Code and standard compliance review
- Risk assessments
- Emergency preparedness evaluations
- Hazard vulnerability analysis
- Process validation
- Policy and procedure review and development
- Commissioning and retro-commissioning
- Mock surveys
- Best practices recommendations
- Project documentation review and development
- Bulk gas system design and contract negotiation

TESTING & VERIFICATION

Inspection & Testing Services

- Periodic and annual inspection programs
- Bulk medical gas system inspection, testing and performance verification
- Piping purity, gas concentration and USP/NF testing
- Gaseous and pipeline distribution system contamination analysis and remediation

Verification and System Certification Services

- Medical gas and vacuum system verifications
- Bulk medical gas system verifications
- Laboratory system verifications
- All testing equipment is NIST traceable
- Detailed reports with all findings and recommendations

Environmental Monitoring and Testing

- Operating rooms and anesthetizing locations
- Central sterilization/laboratories
- Airflow exchange testing, pressure relationship evaluations, ventilation and fume hood

SALES & INSTALLATION

Sales and Installation Services - We offer complete medical gas systems sales and installations including source equipment, zone valve boxes, alarm warning systems, station outlets and inlets, pipeline distribution system materials, secondary equipment and more!

Equipment Rental and Lease Programs - When it makes more sense to lease than to buy – we are here to help. If a shutdown is near, you can rent several pieces of equipment from us including portable suction pumps, specialty regulators, air compressors, vacuum pumps, adapters and hoses and cylinder carts/stands.

System Back Feed and Shutdown Services - We offer shutdown management services that take the worry and danger out of this process. We have all the equipment required to back feed isolated patient areas during a shutdown, thus alleviating the need to have gas cylinders at every bedside or in every operating room. We have the capabilities of back feeding individual zones, floors, wings, buildings or even your entire facility.

The AMG Team

TRAINING

We've developed training programs that are compliant with ASSE 6000, NFPA 99, and NFPA 55. These programs are designed to properly train and certify individuals that are involved with medical gas system design, installation, repair and maintenance. We can also customize courses to meet your specific training needs. We offer the following:

Classroom Training - Throughout the year, we offer ASSE 6000 certification programs at our facility.

Online Training - We offer online training through our sister company, Medical Gas Certifications (MGC). The programs are 100% web based; available 24x7 and they eliminate the need for travel and time away from work.

Customized - If you prefer to have our staff onsite at your location, we're happy to work with you on a tailored program.

24-HOUR EQUIPMENT SERVICE & PREVENTATIVE MAINTENANCE

We offer complete preventative maintenance programs on a wide variety of medical gas equipment and components. Our comprehensive preventative maintenance programs include:

- Service on ALL components from the source to the outlets!
- Suction regulator annual inspection, cleaning and inventory services
- Medical air and vacuum systems
- Manifolds
- Medical gas station outlets
- Articulating booms and manufactured assemblies
- Suction regulators, flow meters and blenders

“THE GOLD STANDARD” in Comprehensive Medical Gas Services!
